Title:

**INSTALLATION OF RUBBER BODY
PLUGS DURING PDS**

Models:

'07 Camry & Camry HV

**PRE-DELIVERY SERVICE
PD021-06**

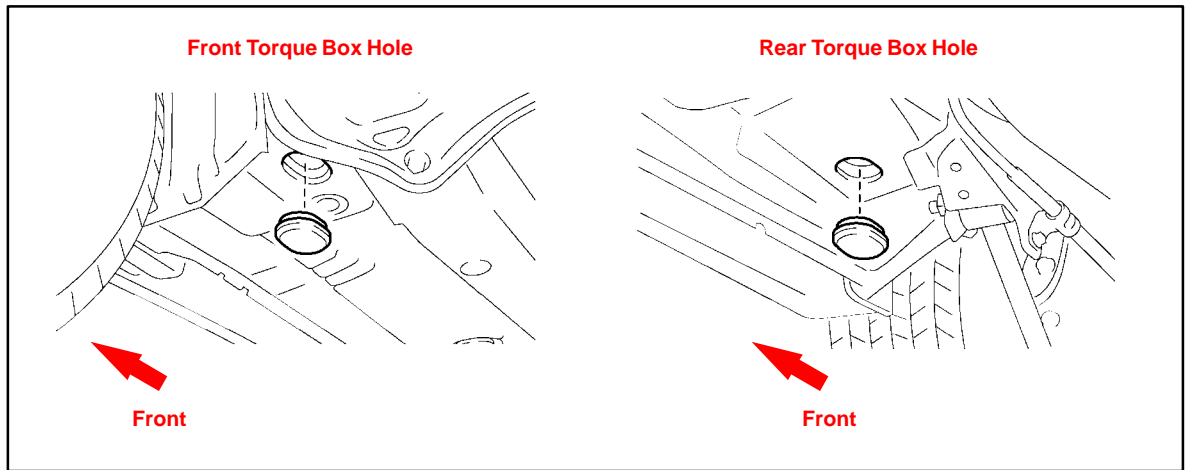

Introduction The Camry and Camry HV are equipped with front and rear torque box holes to tie down the vehicle during transportation. Rubber body plugs need to be installed during Pre-Delivery Service (PDS).

- Applicable Vehicles**
- 2007 model year **Camry** and **Camry HV** vehicles.

Installation Procedure Four (4) body plugs are included in the glove compartment at the assembly plant. Install the rubber body plugs into the two (2) front and two (2) rear torque box holes located under the vehicle on both sides.

NOTE:

If the rubber body plugs are NOT securely installed, road (tire) noise may transfer to the vehicle interior through the torque box holes.
